

Patient Centered Medical Home Working Group

Meeting date: February 12, 2012 at 8:00 am CST.

Location: State Capital, Room 2102

Agenda:

1. Quality -Formally confirm that quality will be assessed for adult patients using the 33 measures for the CMS Shared Savings ACO performance metrics. Discuss Deb Esser, Scott Applegate, and Tom Tonniges proposal on an acceptable pediatric version using alternative measures where appropriate. Blue Cross Blue Shield will provide their input.
2. Medical Home Sustainability – Participants will review the legal and anti-trust concerns, will have reviewed the documentation provided and provide comments from their respective Legal Counsel.

We will all discuss with our representative groups options for Step 2. One option is to avoid any discussion of exact method of sustainability and make it incumbent on plans to engage a minimum number of clinics in order to have a minimum number of insured patients covered by PCMH. The market would then determine what blend of payments (up front, care coordination payment, per member per month, etc.) is necessary for insurers to contract with a sufficient number of providers to meet their minimum number of covered patients.
3. Review the proposed legislation L. B. 239.
4. Next steps.
5. Set next meeting time.
